

Excel Data Cleaning & Customer Data Analysis

Portfolio Project • Data Cleaning & Excel

Project Overview

I cleaned and organized a customer dataset in Excel by removing duplicate records, checking data quality, standardizing the dataset, and preparing it for analysis. I also created a city-wise summary and a data quality report.

What I Delivered

- Cleaned and organized customer records
- Removed duplicate records
- Checked data quality and email validity
- Prepared a standardized dataset for analysis
- Created city-wise customer and purchase summaries
- Documented the cleaning results in a data quality report

Sample of Cleaned Data

Customer_ID	Name	Email	Phone	City
C001	Rahul Kumar	rahul@gmail.com	9876543210	Hyderabad
C002	Priya Sharma	priya@gmail.com	9876543211	Hyderabad
C003	Amit Singh	amit@gmail	9988776655	Delhi
C004	Sneha Rao	sneha@gmail.com	9999999999	Hyderabad
C006	Arjun Mehta	arjun@gmail.com	8888888888	Mumbai

City Summary

City	Customer_Count	Total_Purchase	Average_Purchase
Bangalore	1	2100	2100
Chennai	1	1900	1900
Delhi	2	6300	3150
Hyderabad	4	9800	2450
Mumbai	1	2750	2750

Tools & Skills

Microsoft Excel • Data Cleaning • Data Processing • Data Entry • Data Analysis

Result

The final workbook is structured, readable, and ready for further analysis or reporting.
